Computer Science Undergraduate (Class of 2028) specializing in Cloud Computing, with a strong interest in Computer Networks, IP Subnetting, and Database Management. Experienced in designing Virtual Private Cloud (VPC) network topologies, setting up public/private subnets, and configuring secure database infrastructure using Google Cloud Platform (GCP). Seeking a Junior Cloud Engineer / Cloud Infrastructure Associate position to apply network architecture and system administration skills.

ORGANIZATION EXPERIENCE

KMK BINUS UNIVERSITY

Staff of Logistics & Equipment (Perkap)

2025 – 2026

Logistics Committee Member (Perkap) | Maret – July 2025

- Authored and structured the logistics requirements within the official event proposal, detailing equipment specifications and itemized checklists.
- Collaborated with event coordinators to align technical equipment needs with the proposed event schedule.

TECHNICAL SKILLS

- Cloud Platforms & Infrastructure: Google Cloud Platform (GCP), Virtual Private Cloud (VPC), IAM, Infrastructure
- Concepts Networking & Security: Computer Networks, IPv4 Subnetting & CIDR, Routing Concepts, Cloud Security, Firewalls / Security Groups
- Databases & Storage: Database Technology, Relational Databases (MySQL / PostgreSQL), SQL Concepts
- Operating Systems & Programming: Linux / Unix Administration, Operating Systems, Web-Based Programming, Object-Oriented
- Programming Concepts & Methodologies: Software Engineering, DevOps Concepts, Systems Administration

EDUCATION

Bina Nusantara University (Binus University) - Bandung, Indonesia

Sarjana Komputer (S.Kom.) in Computer Science | Expected Graduation: 2028

- Streaming / Specialization: Cloud Computing
- Relevant Coursework: Computer Networks, Database Technology, Cloud Computing & Services, Cloud Security, Operating Systems, DevOps in Cloud Environments, Software Engineering

CERTIFICATION

Google Cloud Computing Foundations Certificate [View certification](#) 

Databases for Developers: Foundations
