MARIA LOUISA ALFIANTO

Bandung | (+62) 81222547618 | linkedin/in/maria-alfianto | marialouisaalfianto@gmail.Com| website portofolio

Computer Science Undergraduate (Class of 2028) at BINUS University specializing in Network Engineering, IP Subnetting, and Database Infrastructure. Hands-on experience in designing Virtual Private Cloud (VPC) network topologies, allocating custom CIDR subnets, configuring firewall security rules, and setting up relational database environments. Proficient in networking fundamentals (TCP/IP, OSI Model, Routing, Switching, VLANs) and Linux system administration. Seeking a Network Engineer / Network Infrastructure Intern position to assist in network implementation, automation, and technical operations.

EDUCATION

Bina Nusantara University (Binus University) - Bandung, Indonesia
Sarjana Komputer (S.Kom.) in Computer Science | Expected Graduation: 2028

- Streaming / Specialization: Cloud Computing
- Relevant Coursework: Computer Networks, Database Technology, Cloud Computing & Services, Cloud Security, Operating Systems, DevOps in Cloud Environments, Software Engineering

TECHNICAL SKILLS

- Networking & Protocols: IPv4 Subnetting & CIDR, TCP/IP Stack, OSI 7-Layer Model, Routing Concepts, Switching Basics, VLAN Isolation, Ethernet Standards.
- Network Security & Infrastructure: Cloud Firewalls, Security Groups, Access Control Lists (ACLs), Network Topology Architecture, Linux CLI Administration.
- Databases & System Management: Relational Databases (MySQL / PostgreSQL), SQL DDL Scripting, Database Schema Design, Database Security.
- Cloud & Tools: Google Cloud Platform (GCP VPC), Docker Containerization, Git, GitHub, REST APIs, Shell/Bash Scripting.

PROJECT & NETWORK BUILDS

Enterprise IPv4 Subnetting & GCP Network Architecture | Cloud & Network Infrastructure

- Designed a multi-tier Virtual Private Cloud (VPC) network topology on GCP with custom IPv4 CIDR block allocations.
- Formulated strict public/private subnet isolation and firewall security rules to protect database instances from external threats.

Relational Database Infrastructure & Network Logging | Database & Systems

- Constructed normalized SQL database schemas (PostgreSQL / MySQL) utilizing foreign keys, indexing, and primary constraints.
- Authored DDL scripts for structured network event logging, firewall rule audit trails, and automated testing via Docker containers.

Linux Network Services & Systems Administration | Systems Admin

Configured Linux/Unix server environments with shell scripts, SSH key access control, and basic port routing/proxy setups.

ORGANIZATION EXPERIENCE

KMK BINUS UNIVERSITY
Staff of Logistics & Equipment (Perkap)
2025 – 2026
Logistics Committee Member (Perkap) | Maret – July 2025

- Authored and structured the logistics requirements within the official event proposal, detailing equipment specifications and itemized checklists.
- Collaborated with event coordinators to align technical equipment needs with the proposed event schedule.

CERTIFICATION

Google Cloud Computing Foundations Certificate View certification
Databases for Developers: Foundations
